The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The specification and drawings clearly indicate that it is “one of the *patterning device* and the substrate” that is held on the pimple plate during operation of the lithographic projection apparatus, not “one of the *patterned beam* and the substrate” as is claimed in line 8 of the claim. A beam of radiation cannot be held on a plate.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Kendall. Kendall discloses a holding means (the electrostatic chuck part of Kendall's membrane electrostatic chuck 32) for holding at least one of a patterning device and a substrate in a lithographic projection apparatus that comprises means for projecting a patterned beam of radiation onto a target portion of a substrate (see lines 35-45 in column 4) and means (the membrane part of Kendall's membrane electrostatic chuck 32) for resiliently supporting said holding means. While Kendall does not explicitly describe the lithographic projection apparatus, the use of the disclosed holding means for its disclosed purpose inherently requires such lithographic projection apparatus.

Claims 1-12, 15, and 16 are allowed.

Claim 13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: While pimple plates are known in the art for holding either patterning devices or substrates (see, for example, U.S. Patent No. 5,656,093 to Burkhardt et al., cited in the Information Disclosure Statement filed on May 28, 2004), there is no suggestion in the prior art to use such a pimple plate support chuck as the chuck component of Kendall's membrane electrostatic chuck.
